Pablo Díaz-Jorge García

Software Engineer & AI Engineer | AI agents, MCP and agent evaluation | Frontend architecture with Angular and TypeScript

Vilamarxant, Valencia, Spain - pablodiazjorge.com - github.com/pablodiazjorge - linkedin.com/in/pablodiazjorge

Software engineer focused on **architecture**, thoughtful design and sound engineering practices. I build scalable, accessible web applications with Angular, TypeScript, Signals and RxJS, and I apply **AI engineering** to development: I bring AI agents and MCP into the workflow and measure with data what they add. Contributor to rea (130,000+ GitHub stars, three merged PRs) and author of open-source projects with public deployments and automated tests. Expanding into backend and databases with Node.js, Java and PostgreSQL.

TECHNICAL SKILLS

Frontend: Angular (16 → 22), TypeScript, Signals, RxJS, Web Components, SSR, web accessibility, Tailwind CSS, SCSS

AI Engineering: AI agents, Model Context Protocol (MCP), Claude Code (mods, skills and hooks), agent evaluation

Backend & Tooling: Node.js, Express, Java, Spring Boot, PostgreSQL, pgvector, Docker, Vitest, Playwright, GitHub Actions, Scrum

PROFESSIONAL EXPERIENCE

Frontend Engineer — Infoport, Sept 2025 - Present

- Design and development of accessible, scalable interfaces for the port logistics sector using Angular, TypeScript, Signals, and RxJS.
- Integration of AI coding assistants and MCP into the team workflow to speed up refactoring, code review and testing.
- Reusable components with SCSS and custom libraries, in an agile Scrum team alongside analysts and backend developers.

AI Engineer (open source) — Own projects, Jan 2026 - Present

- Contributor to **rea** (130,000+ stars): three merged PRs on the Ghidra verification and the Claude Code and Gemini CLI client checks on Windows, and an open PR in the MCP server (Node.js and TypeScript).
- **rea-lab**: TypeScript benchmark and a preregistered study of 70 Claude Code runs, graded with no LLM as judge and analysed with Wilson intervals and McNemar tests.
- Published Claude Code mods (**rea-casebook**, **impact-radius**) with CI on Windows, macOS and Ubuntu; **prompt-forge**, **Candle AI**, **TestMaker** and **gym-log**, built with agents.

Independent Software Engineer - AI & Frontend R&D — Jul 2023 - Sept 2025

- Researched and prototyped 4 open-source solutions between frontend architecture and AI engineering: **Token Cost Analyzer** (tiktoken in WASM, D3.js, Angular 19), **Cognitive Agent Orchestrator** (ReAct agents, SSE, Node.js, Ollama), **Semantic Search Engine** (Java 21, Spring Boot, PostgreSQL, pgvector, Angular 17) and **Attention Matrix Explorer** (D3.js, Web Workers, Angular 16).

Full Stack Developer (internship) — NTT DATA, Mar 2022 - Jul 2022

- End-to-end personnel management system with Angular and Java (Spring Boot): REST services and data visualization.

Data Analyst (internship) — Sothis, Mar 2018 - Jun 2018

- Database analysis and design for corporate compensation plans (MySQL, Power BI).

FEATURED PROJECTS

- **rea-lab**: public lab for reverse engineering with AI agents: reproducible environment, 40 challenges with known answers and a preregistered study. github.com/pablodiazjorge/rea-lab
- **Candle AI**: technical analysis dashboard with a Bayesian confluence engine, Angular 22, Pine Script v5 and 165 tests. candle-ai.pablodiazjorge.com
- **TestMaker**: secure exam platform with AES-256-CBC, Angular 21, serverless API, PDF export and 18 Vitest tests. test-maker.pablodiazjorge.com

EDUCATION

Bachelor's Degree in Computer Science — UPV, 2018 to 2023

Higher Technician in Multiplatform App Development — CIPFP Cheste, 2016 to 2018

CERTIFICATIONS & LANGUAGES

- **Scrum Master Professional (SMPC)**, CertiProf, June 2026
- **Claude Code in Action**, Anthropic, January 2026
- **Languages:** Spanish and Valencian (native), English (full professional proficiency)
